

## Search Land

### Fail

You did not find the treasure, but you followed the river and you can see that far far away it leads to the Sea! Did you know that all rivers in one way or another always end up to the Sea?

### Success

Nested in the riverbed, you see a sparkling essence! Congratulations, you found the treasure! The earth relies on water to survive, as plants, animals and humans alike need clean water daily!

## Search Water

### Fail

Despite your best efforts, you are sure that there is no treasure here. You found however the deep sea algae that grow in mesophotic reefs! Did you know that they are a main food source for the fish?

### Success

You catch a sparkle of light being carried away by the current. With a flap of the fins, you reach it, and it is indeed the Treasure! Did you know that 70% of Earth's surface is covered in Water?

## Ask Water (deep sea)

### Hint

A pearl octopus looks at you in puzzlement - Hmmm... a treasure... Maybe... Have you searched in the water body that is connected to the Atlantic Ocean, the Red Sea, and the Black Sea?

## Ask Water (near land)

### Hint

A family of friendly crabs is excited to share what they know - We did hear a rumour! Have you searched where there are over 500.000 natural lakes?
